Improved efficiency for  
**new & retrofit**

### **Save Energy, Fuel & Money**

- Reduce electricity consumption through fan speed control
- Reduce fuel consumption through optimised air / fuel ratio

### **Reduce Maintenance Costs**

- Simplified mechanical arrangement reduces wear
- Prolonged motor life through reduced operating speed & load

### **Improved Safety**

- Maintain Correct air / fuel ratio during changing operation
- Reduced risk of CO creation
- Improved control ensures the correct temperature setpoint is maintained more accurately
